Education

CMR Institute of Technology, Bengaluru — BE, AI & ML

2022 – 2026 CGPA: 8.91

Uniglobe College, Kathmandu — 12th Science

2022 GPA: 8.875

Ideal Model School, Lalitpur — 10th

2020 GPA: 9.375

Technical Skills

Languages:	Python, C, Java, JavaScript, TypeScript
AI/ML:	LangChain, LangGraph, TensorFlow, PyTorch, Scikit-learn, Hugging Face, Google ADK, RAG, NLP, OpenCV
Web:	React, Next.js, Node.js, Express.js, Flask, Django, FastAPI, Tailwind CSS
Databases:	MySQL, SQLite, MongoDB Atlas, Supabase, Neon PostgreSQL
Cloud & DevOps:	AWS, Azure, GCP, Docker, Jenkins, CI/CD, Vercel, Render
Tools:	Git, GitHub, VS Code, Jupyter, LangSmith, Payment Gateways (Khalti), RESTful APIs, WebRTC

Professional Experience

Freelance Full Stack & AI Developer — Self-Employed, Bengaluru

Oct 2025 – Present

Delivering 4 client projects end-to-end across Nepal, handling architecture, development, payment integration, and deployment.

- **PRIMEFACE** (theprimeface.com) – Vastu consultancy platform with **Khalti payment gateway**, service booking, and email automation; Next.js
- **Purnima Suppliers** (purnimasuppliers.com) – E-commerce storefront for a 15+ year brand with product catalog and deals management; Next.js
- **Neelopatra** (neelopatra.com) – AI news platform with NLP summarization, fact-checking pipeline, and chatbot-powered retrieval; Next.js
- **Er. Bikram Babu KC Portfolio** (bikrambabu.com.np) – Personal brand site for a civil engineer with project showcase; Next.js

SuprMentr — AI & Cloud Engineering Intern, Bengaluru (Remote)

Feb 2026 – May 2026

- Built two hybrid deepfake detectors flagging diffusion-generated images (SD 3.5, FLUX.1, Midjourney v7, Sora) with no metadata or watermarks; a ViT + NPR-guided CNN ensemble combined semantic and pixel-level artifacts to reach **97.5% validation accuracy** (AUC **0.9979**) on 47,181 images
- Designed **DeepShield**, a three-stream vision transformer (spatial, frequency-domain, global semantics) with gated fusion hitting **96.2% cross-generator accuracy** (AUC 0.9941); shipped both models as FastAPI services with built-in explainability via saliency heatmaps

Areta360 Technologies Private Limited — Engineering Intern, Bengaluru

Apr 2025 – Oct 2025

- Built NL2SQL agents (Spider 2.0 + LangChain + Google ADK) achieving **85% accuracy** with async task handling and real-time React UI integration
- Engineered virtual try-on solution using Hugging Face diffusion models; deployed LLMs on cloud VMs with human-in-the-loop validation and indexed DB queries

Projects

- **Smart AI Interviewer (SAI)** | Python, FastAPI, React, Google ADK, Gemini, Neon PostgreSQL, Piston API
Multi-agent interview system with adaptive difficulty, live code execution, and real-time feedback for technical, system design, and behavioral rounds.
- **AI Drug Interaction Platform – MediSync** | Python, Flask, React.js, Node.js, MongoDB, H2O.ai
Full-stack healthcare app for drug interaction detection and alternative suggestions with ML-powered predictive analytics and prescription history tracking.
- **Real-Time Stock Trading Platform** | React, MongoDB Atlas, Node.js, Express.js, Vercel
Stock trading simulator with real-time price analysis, portfolio management, and RESTful microservices architecture.
- **Student Safety Tracking System** | Django, Flask, OpenCV, SQLite, Google Maps API
Campus security system with face-recognition attendance, real-time geolocation tracking, and international student monitoring dashboard.

Achievements and Certifications

- **Winner:** 1st Prize – Full Fiesta Hackathon (2025) & FSD Hackathon; 2nd Prize – Mini Project Exhibition (2023)
- **Finalist:** 6+ national hackathons including Flipkart GRID 6.0 (2024) and Quant-A-Maze 2.0 (2024)
- **Certifications:** Machine Learning Specialization (Coursera / DeepLearning.AI); DSA & MERN Stack (Apna College)
- **Technical Writing:** Published on Medium – Backend & System Design for 2026, Data Engineering best practices
